Re: Trench Area Well Analytical Data - Syntex Agribusiness, Inc., Verona, Missouri Facility

Dear Mr. Sanders:

Please find attached a table summarizing analytical data for groundwater samples collected from the Trench Area monitoring wells during March 1995. Samples for volatile organic analysis were collected from MW-12 and MW-13 in March 1995. However, these samples were collected without purging the wells which may limit the representativeness of them. No samples for semivolatile or 2,3,7,8-TCDD analysis were collected because the volume of water present in the wells was insufficient.

If you have any questions, please give me a call at (417)868-3337. Thank you for your attention in this matter.

Sincerely,
SYNTEX AGRIBUSINESS, INC.

T. Scott Barton

SUPERFUND RECORDS

**SUMMARY OF TRENCH AREA MONITORING WELL RESULTS - MARCH 1995
SYNTEX AGRIBUSINESS, INC., VERONA, MO FACILITY**

Well ID	Volatile Organics (mg/L)	Semivolatile Organics (mg/L)	2,3,7,8-TCDD (mg/L)
MW-11	ND	ND	ND
MW-12*	ND		
MW-13*	ND		
MW-17	ND	ND	ND

ND Analytes were not detected above quantitation limit.

* Samples for volatile organic analyses were collected from MW-12 and MW-13 without purging of the wells due to the small volume of water present in each well. No samples for semivolatile or 2,3,7,8-TCDD analyses were collected because insufficient water volume.
